

Border Lite Twin

Cat. No. BLT
Cat. No. BLT/R

HUNZA®

The Border Lite Twin has two individual heads which can be aimed in different directions, making it ideal for path lighting giving a wide spread of light with no upward projection. Each light has a fully adjustable arm allowing 360 degree rotation and 0 - 90 degree elevation.

The Retro™, which is a mains option, avoids the need to bury a transformer. The 110/240-12 volt electronic transformer is built into the pole and is a double insulated safety isolating transformer, this changes the luminaire to an IP56 rating.

This luminaire is equipped with Hunza's Anti-Syphon™ (not Retro luminaires) system which has been designed to counter the problem of wicking (siphoning) of water through the supply cable into the lamp housing, causing water to condense and dramatically shorten the life of the lamp, lamp holder and luminaire.
