

# Wall Spot Metal Halide

Cat. No. WSMH20

Cat. No. WSMH35

The Wall Spot Metal Halide has been designed to be mounted on walls and provide directional light for pathways and structural elements of a building. It has a fully adjustable arm allowing 360 degree rotation and 0 - 90° elevation and is water resistant.

The luminaire is machined from a choice of 10mm thick aluminium with a UV stable powder coated finish, solid copper or 316 stainless steel with a clear, tempered, flush glass lens and high temperature silicon gaskets.

Metal Halide lamps are highly energy efficient light sources using less energy and out putting 2 - 3 times the light of a halogen lamp. This luminaire uses a MR16 GX10 20 or 35watt lamp.
